

The Alchemy of Prague

2016

*10 days of absolute
fun in one of the
most beautiful and
magical cities
in the world.*

Starts June 3, 2016

Welcome to The Alchemy of Prague Event

The Alchemy of Prague Event is
sponsored and supported by:

We have an incredible line up of presentations, trainings, workshops, a conference and tours all beginning on the evening of June 3rd, in the heart of the alchemical history of Prague, the Edward Kelley tower! This is where John Dee and Edward Kelley would attempt to make their alchemical musings, among the other rich dramas of that time! The setting is perfect for one of the foremost alchemical teachers in the world, Aurelius Electrum (Paul from Canada), to conduct his workshop. We will set up a practical alchemical lab with its array of beakers, vials and fires and take you through the process of making plant medicines in the traditional way, full of its extracted life forces.

The following weekend will be a gathering for the International Water Technology Symposium. Experts from all around the world will present their cutting edge ideas on the power and magic of water, hydrogen and oxygen.

In-between the two major educational weekends, we have a week of intriguing walking tours of Prague, a river cruise party, day trips to old Bohemia and lectures on the history of the Alchemy of Prague and an Enochian-Ophanic-Angelic language ritual workshop! **It does not get better than that!**

In Prague you will be totally surrounded by sacred geometry, alchemy and an aura of mystery! It is a place filled with fascinating culture and spiritual history. The building materials (made from paramagnetic rock), the cobblestone streets, the classical architecture based on sacred geometry and the intimate human scale (not to mention the best beer in the world) and the conviviality of your fellow adventurers all adds up to a powerful, beautiful and unforgettable personal experience.

Because of our unique historical venues, there is a tight limitation to space, so first in first served to secure your place! We highly recommend to book now, as we are nearly half booked at time of writing and June is a popular time to be in Prague.

Get the best deal by booking and making payment by the April 1st, 2016.

Start planning your trip now...

Into the Rosy Heart of Alchemy & the Science of the Sacred

So rich and beautiful was Prague five centuries ago that it was called "The Golden City" (die Goldene Stad) - and the name, like its beauty, has remained. The fame of the "crossroads of the medieval world" spread along the great highways and rivers of Europe and fired the imagination of generations of poets, peasants, artists, philosophers and alchemists.

The architecture of this fairytale city, dominated by a great castle, ancient pinnacles and spires of gold-filled churches, captures a mysterious mystical quality rarely encountered in the world today.

Legend has it that Princess Libuse, who could tell the future, founded Prague on the spot where she saw a man carving a threshold, in Czech called a 'Prah', for his house.

Nicknames for Prague have included "the Mother of Cities" (Praga mater urbium,) and "City of a Hundred Spires".

The greatest flourishing of Alchemy in Europe came during the reign of Rudolf II (1575 -1611) when important Czech and foreign alchemists lived in Bohemia. This was a prosperous period for the city, famous people living here at the time included the astronomers Tycho Brahe and Johannes Kepler, the painter Arcimboldo, the alchemists Edward Kelley and John Dee, the poetess Elizabeth Jane Weston, and many others.

The Feng Shui of Prague is based on it being surrounded by seven hills, similar to the seven hills of Rome, and the seven hills of Dublin's "Loves Body" written by

James Joyce. Seven church sites occupy the seven hills of Prague - and the ancient plan of this powerful location was to establish a pattern of five sacred sites inside and seven on the outside - making the symbol of the "Rosy Cross" an almost perfect geometric symmetry.

Prague is one of the most beautiful cities in Europe with preserved examples from all periods of its history and is among the most visited cities on the continent. Since 1992, the extensive historic centre of Prague has been included in the UNESCO list of World Heritage Sites. According to Guinness Book of World Records, Prague Castle is the largest ancient castle in the world.

We will have walking tours of Prague, visiting the famous Astronomical Clock, located in the mystical town square, the Prague Castle where we will study its constellation alignments, and the famous Charles Bridge. Our local guide Eliska Bridges will reveal the hidden secrets of many other 'special off the track locations'. The Czech Republic boasts more than 2,000 preserved castles and chateaux. Our 'package event' will also include days of exploring in Kutna Hora, built on a silver ore field near the legendary Sedlec Ossuary "Bone Church", and the medieval alchemical township of old Bohemia "Cesky Krumlov". During the week we will have talks on the history of Alchemy in Prague and also a workshop on the infamous Enochian Ophanic Angelic language developed by John Dee, with international experts Dr. Teresa Burns and Alan Burns taking you through a special ritual accompanied by beautiful harp music.

Roger Green and the streets of Prague

Your host and sponsor Roger Green has taught in Prague every year since 1998. He has sponsored Feng Shui, Sacred Geometry and Ecology conferences in Prague and Budapest. His New York based "Academy Healing Nutrition" has a branch of its curriculum running in Prague, he also teaches modules from his classical Feng Shui trainings there annually.

In 2009 he sponsored the first "Alchemy of Prague" event, where he invited the foremost esoteric historian, Vincent Bridges, from South Carolina, USA. Vincent ended up living in Sir Edward Kelley's house, tower and alchemical crypts and was the curator to the newly renovated Alchemical Museum and the House of the Donkey and Cradle theater and bar, where some of our alchemical training with Aurelius Electrum will take place.

Vincent was in the process of finishing some major manuscripts based on the missing years of William Shakespeare and also a book on the life of John Dee and a book on Edward Kelley. Sadly, Vincent passed away July 2014 in Prague, on the night of his gala performance of his play at the Donkey and Cradle.

Some of his life's work will live on through his friend and translator Eva and his partner Eliska, who will be your guides in Prague and on the tours of old Bohemia. His colleagues from the USA, Dr Teresa Burns and Alan Moore, will conduct an Enochian Angelic Language Ritual workshop as part of the event in honor of Vincent's work in this field.

Dedication

Vincent Bridges (1952-2014)

The 2016 Alchemy of Prague event is dedicated to the memory of our dear friend and teacher Vincent Bridges. We invite you to join us and meet others who share and love this attunement and respect for Nature, Esoteric Spirituality and the Devine.

Vincent Bridges was an internationally known author, lecturer and esoteric historian. He co-authored two books with Dr. Teresa Burns on the mysterious 20th century alchemist Fulcanelli and was co-author of "Mysteries of the Great Cross at Hendaye" and "Alchemy and the End of Time". Vincent was the expert commentator and historical consultant on the History and Discovery Channel shows on Nostradamus. At the time of his passing, he was working on several books with themes such as Shakespeare, Rudolphine Prague and the

Hermetic Revolution.

He was international authority on the Ophanic Angelic Communication (*perhaps the original languages and the ultimate language of initiation*). Vincent also taught and wrote about many aspects of Alchemy, John Dee, Sacred Geometry, Fulcanelli, Grail Legends, Nostradamus, Earth Mysteries, I Ching and Ancient Egypt. He was a world traveler, and organized and led tour groups to Southern France, Egypt and India. In 2010 he relocated from South Carolina USA to Prague to continue his research

into the lives of John Dee, Edward Kelly and the missing years of William Shakespeare. His as yet unpublished titles are "Shakespeare, John Dee and the Hermetic Revolution: Alchemy and Espionage in the Magickal Theatre of Elizabethan England; John Dee, Edward Kelley and William Shakespeare: Alchemy and espionage at the court of Rudolph II"

Timetable of Events

June 3rd, Friday 7.30pm

Gathering at Edward Kelly's Tower

- Drinks at the House of the Donkey and Cradle (Alchemical museum)
- Introduction talk and slide presentation by Aurelius Electrum (Paul from Canada)
- Outside party in the courtyard / Donkey and Cradle / tour of the Alchemical museum
- Ambient Harp music by Alaerian
Meet fellow traveling companions, tour guides and teachers.

June 4-5th

Saturday and Sunday, 9.30am-5pm

Alchemical training with Aurelius Electrum

June 6th, Monday 9.30 am-1pm

- History of Alchemy in Prague with Dr. Teresa Burns and Alaerian
- Lunch

3pm:

- Prague walking tour (Part 1) with Eliska Bridges Prague Castle, Lesser Town

7pm: River cruise and party on the beautiful Vltava

June 7th Tuesday, 9.30 am-1pm

- Workshop and Ritual: Enochian Ophanic-Angelic language with Dr. Teresa Burns and Alaerian

- Lunch

3pm:

- Prague tour (part 2) with Eliska Bridges
- Old and New Towns and the Jewish district
- Evening free time to enjoy the sparkling streets of Prague

June 8th Wednesday, 8am

Full day tour of Cesky Krumlov

Coach departs Central Prague at 8am

June 9th Thursday, 8am

Full day tour of Kutna Hora

Coach departs Central Prague at 8am

June 10th Friday, 7pm

Healing Water Conference starts at 7pm

Introduction evening with welcome drinks

Venue: Maitrea

(Central Prague/Old Town Square)

June 11-12th

Saturday and Sunday, 9.30am-5pm

Healing Water Conference, Water, Hydrogen technologies and Oxygen therapies with several international presenters.

Venue : Maitrea

Sunday evening dinner party

Day 1

Introduction to Practical Alchemy

Join us for an exploration into the philosophy, theory and practice of the alchemical traditions.

A
PHILOSOPHICAL
CHEMISTRY IN
WHICH BASE
ELEMENTS ARE
TRANSFORMED
INTO SOMETHING
WHICH, THROUGH
A PROCESS,
BECOME MORE
REFINED,
RENEWED AND
MORE PURE IN
CORE ESSENCE.

Evening Talk and Welcoming Party

Friday 7pm, June 3rd, 2016

Meeting point: Clock Tower Old Town Square. Prague 6pm

- Spagyric Plant Medicines
- Elixirs
- The Magic of Water
- Advanced Energy Technologies
- Sacred Geometry

alchemy

On Friday evening, before the weekend workshop, we are having a presentation with our Alchemy teacher Aurelius Electrum from Canada. This is a good chance for you to get a sneak peak at this weekend's Alchemy workshop and network and socialize with our guides and teachers for the "Alchemy of Prague" event.

Drinks are available at the famous alchemy bar "The House of the Donkey and Cradle".

We are all gathering at the famous Kelley Tower in the foothills of Prague Castle. This is where Edward Kelly and John Dee, the foremost alchemists of their time, were living in Prague and supported by King Rudolf II. The tower has been turned into an Alchemical Museum, originally curated by our dear friend Vincent Bridges

Days 2 & 3 The Ancient & Modern Techniques of Alchemy

Learn how to make your own plant medicines

Practical Alchemy *The Art of Distillation **June 4-5th, 10-5pm, 2016**

Join us for an exploration into the philosophy, theory and practice of the alchemical tradition.

Learn the history of Hermetic Mysticism and the techniques used by the forefathers of modern chemistry, herbology and medicine. This two-day seminar (*plus Friday evening introduction at the Donkey and Cradle*) will provide an in depth look at both inner and outer alchemy utilizing a wide spectrum of alchemical teachings including Vedic, Taoist and the Western Hermetic Traditions.

This is a practical workshop where we set up an alchemy lab so you can witness the complete experience. We'll look at various laboratory apparatus, their description, set-up and use, as well as laboratory safety. Working with the plant kingdom through the art of distillation, we'll create an alchemical menstruum as well as an essential oil for your personal use. Participants will also take home bottles of the Spagyric tincture and essences we will create in the class.

The goal of this course is to provide you with a foundation for a physical, mental and spiritual understanding of the fundamental mechanisms of Nature, through the magical spectacles of the Western Esoteric Alchemical Traditions

Course outline June 4th

- Alchemy Philosophy, Theory and Practice
- The role of Sacred Geometry in Alchemy
- Types of Alchemy
- Laboratory Safety
- Lab Equipment
- Distillation Setup
- Rectification of the Spirit of Rosemary
- Three Alchemical Principles in the Three Realms
- Alchemical History
- Paracelsus
- Rudolph II
- John Dee and Edward Kelly
- Tycho Brahe
- Johannes Kepler
- Isaac Newton

Course outline June 5th

- Herbal Tincturing
- Essential Oil Distillation
- Calcination
- Planetary Correspondences
- Alchemical Elixirs
- Spagyric Herbal Tincture
- Spagyric Herbal Essence
- Preparation and Uses of Herbal Elixirs
- Seven Planetary Elixirs
- Preparing for the Mineral Work
- Alchemical Relationships
- Kabbalah
- Bottling of Products
- Advanced Future Courses Summary: ormus gold and other metals, incense making, medicinal essences, tinctures, elixirs and brewery.

What is Alchemy?

Spagyrics

Spagyrics “open” medicinal plants completely to release powerful healing properties. It is a method of separating and preserving the hidden qualities (signatures) of plants and minerals in elixirs, tinctures, and powders. The result is subtle

yet powerful medicines free of the impurities normally associated with their gross material forms. By learning to make tinctures and elixirs and work only with essences, you will become healthier, mentally clearer, and spiritually stronger for the challenges of the Great Work ahead.

What is Alchemy

Alchemy is one of the world's oldest traditions - a unique blend of science and spirituality and is often referred to as divine chemistry. Alchemy offers a way of living in accord with the basic patterns of the universe, which can result in magical transformations in your life and has the potential to create a new vision of the world.

The word alchemy comes from the Arabic ‘al kima’. The great Egyptian adept king Thoth (*and the feminine consort Ma-at*), named by the Greeks as Hermes Trismegistus (*As Above, So Below, As within, So without*) are thought to have been the founders of the art. Since ancient Egyptian times, alchemists have worked

in secret to produce something called the Philosopher's Stone, or the Elixir of Life, what the Egyptian's called Mfkzt, or what Mozes called Manna. The earliest use of the modern word Alchemy is found in the works of Julius Firmicus Maternus, the Astronomer, who lived in the fourth century, in the time of the Emperor Constantine. However, regardless of where the word ‘alchemy’ began, it has come to mean a very special form of spiritual development.

Simply, Alchemy is the art of transmutation and can be thought of as the raising of vibrations. In the physical sense we hear stories of old disseminating the idea of turning ‘lead into gold’. The metaphor here is the idea of transforming something from a gross, unrefined state to a perfect and purified form and this process has come to be known as transmutation. Through the learning, understanding and application of alchemical principles, modern science and quantum physics can return to its roots, that of an inseparable universe, and where the role of consciousness and ethics has a hand in working with matter. “Paracelsus summarized this rather well when he pointed out that the alchemical transmutation was impossible unless the alchemist HIMSELF was in the process of transformation.” - *Manley Palmer Hall*

Turning base metals into gold can also be viewed as more than a chemical operation carried out with laboratory equipment, as we read more into alchemical literature we see that a great deal of the work is aimed at a mental and spiritual level and transmutation of the Soul.

Spirituality

Day 4

History of Alchemy in Prague

History of Alchemy in Prague with Dr. Teresa Burns and Alaerian

9.30 am to 1pm, Monday 6th June.

Venue: Maitrea

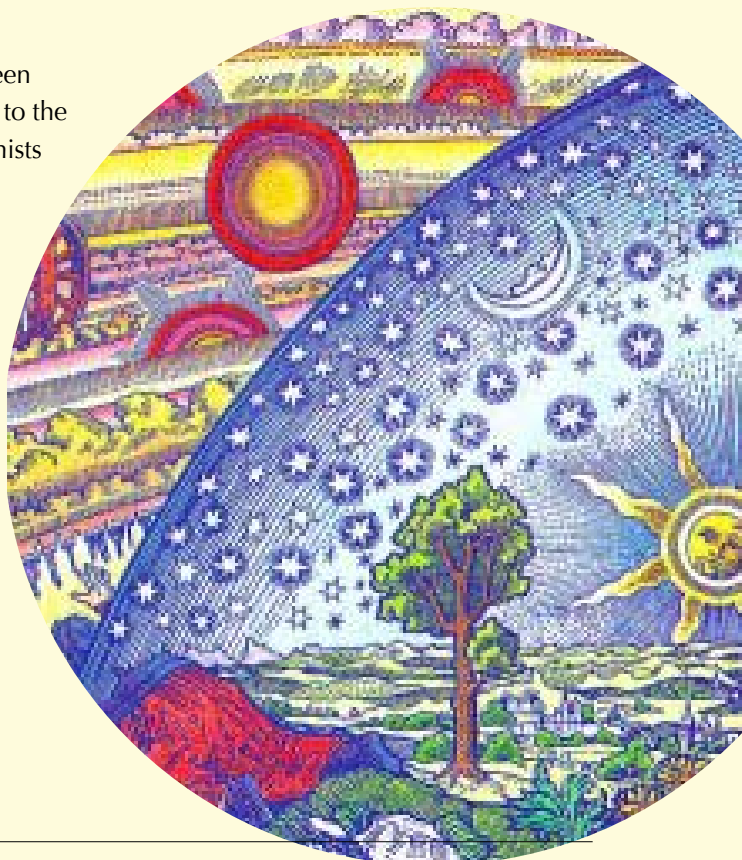

Dr. Burns will give a “picture-heavy” presentation on the “History of Alchemy in Prague,” as expressed in art, architecture, herbals, glasswork, mineralogy, music, poetry, and theater. Collectively these provide the cultural contexts for what might otherwise seem unusual

appropriations of alchemical ideas into areas ranging from Hermetic Astrology to bloodline politics, or from proto-chemistry to apocalyptic philosophy.

The presentation will also discuss some floor plans of Hermetic architectural masterpieces (like the hexagonal Star Summer Palace), the connection between mining and alchemy, and introduce us to the intertwined lives of some of the alchemists and proto-scientists associated with Renaissance Prague, including Tadeáš Hájek, John Dee, Edward Kelley, Tycho Brahe, Oswald Croll, Michał Sedziwój, and Michael Maier. We’ll finish by explicating some of Kelley’s and Maier’s alchemical emblems, looking at alchemical emblems embedded in Shakespeare’s King Lear, and listening to the musical alchemy of Maier. This will lead us into the two days of walking tours of Prague with Eliska Bridges.

Topics

- Hermetic architecture in Prague
- Alchemy as it intersects with art, architecture and theater
- Alchemy as the “Theater of the World”
- Alchemical recipes for “kitchen alchemists”
- Alchemy and the apocalypse: Prague as New Jerusalem
- A Renaissance enigma: it Alchemy? Magic? Espionage?
- Reported successful transformations: George Ripley, Edward Kelley, Alexander Seton
- Ripley manuscripts in Eastern Europe and the Kelley connection
- Michael Maier’s alchemical emblems and music
- Harp Music by Alaerian

Day 4 CONTINUED

History of Alchemy in Prague

Walking tours of Old Prague

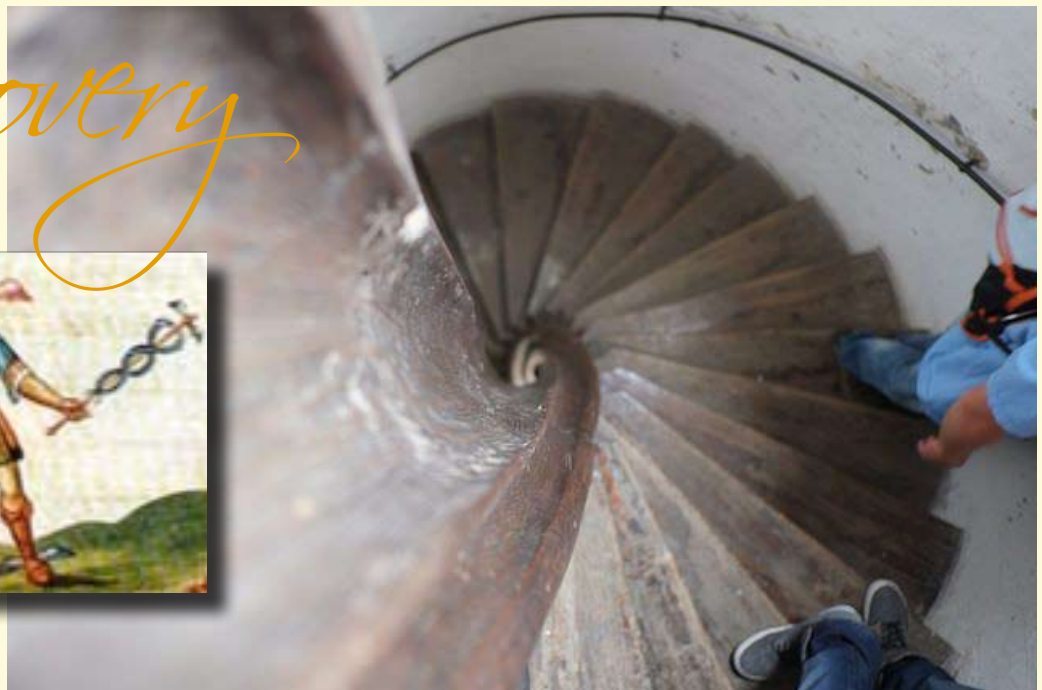

with Eliska Bridges

A New Jerusalem in Bohemia - the Capitol of the Noble Arts

The beginnings of Prague's history emerge from the shadows of paganism and hazy legends. The city prophesied by Libuse grew into being a new spiritual center of the world. It became a magnet for mystics, spiritualists, alchemists, scientists, philosophers, freemasons and artists. The relative religious tolerance was a very important ingredient of this mixture, since it created the base for cross-cultural and cross-interdisciplinary sharing. Prague was and still remains a melting pot of ideas. What beliefs connected Prague to New Jerusalem? Did they have any validity? Who were the seekers who came to Prague, and what were they attracted by?

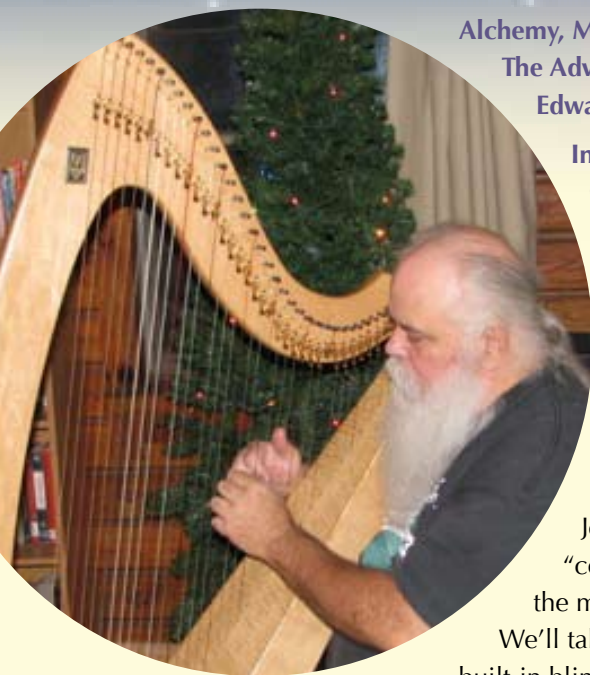

We will look into the old legends, visit the power spots, discover the places where great thinkers lived, and enjoy the Prague game of decoding the esoteric meanings on many of the public facades. You will find yourself standing by the Astronomical Clock in the Old Town Square, at Charles Bridge, in Nerudova Street and at Prague Castle but you won't be hearing just the dates but also the esoteric links and connections in the stories behind these buildings. We will also visit places that are usually off the track of tourist groups such as Bethelhem Chapel, Templar's Church, Emmaus monastery, Maltese Knights district and John's Hill. Seeing both the monuments famous in alchemy circles as well as other places less known is the only true way to get an image of the Capitol of the Noble Arts!

Discovery

Day 5

The Enochian-Ophanic-Angelic Language Ritual

**Alchemy, Magic and Talking to Angels:
The Adventures of John Dee and
Edward Kelley**

**Introduction to Enochian-
Ophanic-Angelic language,
furniture, talismans and
rituals. with Dr. Teresa Burns
and Alaerian**

**9.30 am to 1pm, Tuesday 7th
June. Venue: Maitrea**

In this workshop, we will cover an introduction to John Dee and Edward Kelley's "conversations with angels," and the magical system they engendered.

We'll take you through some of the built-in blinds in this system variously called Enochian, Angelic or Ophanic.

You will learn how Dee's angels were said to be connected to transmutation, and then take a ride through some of the mysteries, claims and practices connected to Robert Hooke's Enochiana (the alphabet represented an elaborate cryptographic system) to the Golden Dawn's claim of a cipher manuscript. We will explore Dan Winter's and Vincent Bridges explorations of Enochian relationship to sacred geometry and Vincent Bridges's discussion of "Angels in the DNA." We'll then step back and look at the correspondences between the Angelic watchtowers and one of the oldest and simplest talismanic symbols: the pentagram. Alaerian will lead the group through a simple pentagram ritual (a group version of the lesser banishing ritual of the pentagram).

We will then incorporate Enochian

elements into a more extended invoking pentagram culminating in the Greater Pentagram, or Watchtower, ritual.

Within this sacred space, Alaerian will demonstrate the rending of the veil and the first two Enochian 'calls', as a way of providing participants with a direct experience of the sounds and feel of the Enochian. We will then take time to talk about what members of the group have experienced. We'll finish by discussing some of the events connected to John Dee and Edward Kelley's continental tour, their mysterious heptagonal ritual, and about Kelley's sudden rise and fall as a Golden Knight of the Holy Roman Empire. We will end with a musical performance and healing angelic harp music with Alaerian.

Day 5 John Dee, The Alchemical Museum, “The House of the Donkey & Cradle” & Old Clock Tower

The tower of Kelly's house, where they did their magical work, is an eight-side octagon and each corner point exactly to the eight points of the compass. We are never really sure whether Edward Kelley (along with his colleague, royal alchemist John Dee) ever really did discover the correct recipe for the Philosopher's Stone that allegedly turns everything it touches into gold. However, Bridges found (through his extensive research in the archives of the Palace) that there are court records that Kelly carried out three effective transformations before court officials and passed each with flying colors.

What was the inspiration behind the Hermetic ideas in the Rosicrucian manifesto? Who were the precursors of the Rosicrucian Enlightenment? The Elizabethan magus and Christian kabbalist John Dee (1527-1608) was the adviser of Queen Elizabeth I, renowned as a philosopher, mathematician, geographer and navigator. A scholar-magician in the Renaissance tradition, he was immersed in the occult arts and the influence of supernatural powers. We join John Dee and Edward Kelley on their continental mission which was inspired by hopes of a major spiritual upheaval and religious reconciliation. His practice of angel-magic and the development of the Enochian-Ophanic-Angelic Language

and alchemy would throw important light on the later Rosicrucian furor. Prague was also a major center of Jewish life and esoteric studies in the 16th Century. It was the home of Rabbi Judah Loewe, the scholar kabbalist reputed to have created the Golem. Alchemists and occultists gathered in Bohemia from all over Europe to exchange ideas and experiences.

Rooms & tunnels have been newly discovered in the crypts that have been sealed since the early 1600s. Vincent often spoke about the history of Edward Kelley in Prague as well as Prague itself being the center of magic and alchemy and also about the mysteries surrounding the famous astronomical & alchemical clock in the old town square of Prague (our group meeting point).

He was fascinated about the old clock which was constructed in 1410 which is covered in all sorts of Hermetic glyphs and symbols and carries mechanisms for three different kinds of time: Lunar time, Solar time and Sidereal time (the fixed stars). The mechanical clock was made by clockmaker Mikuláš of Kadaň and Jan Šindel, the latter a professor of mathematics and astronomy at Charles University. Formerly, it was believed that the Orloj was constructed in 1490 by clockmaster Jan Růže (also called Hanuš); this is now known to be a historical mistake. A legend, recounted by Alois Jirásek, has it that the clockmaker Hanuš was blinded on the order of the Prague Councilors so that he could not repeat his work; in turn, he removed a key piece of the clock, and no one was able to repair it for the next hundred years.

Days 6 & 7

Tours of Old Bohemia

Tours of Old Bohemia with Eva Spolek **Guided day trips to infamous & mysterious** **Cesky Krumlov and Kutna Hora**

For a brief spell in Bohemia, a hermetic, alchemical and kabbalistic enlightenment influenced the seeds of modern science and attempted to give birth to a new era. In her classic book, "The Rosicrucian Enlightenment", the great historian Frances Yates brought alive to the modern world an extraordinary period in early 17th Century Europe, long lost to memory.

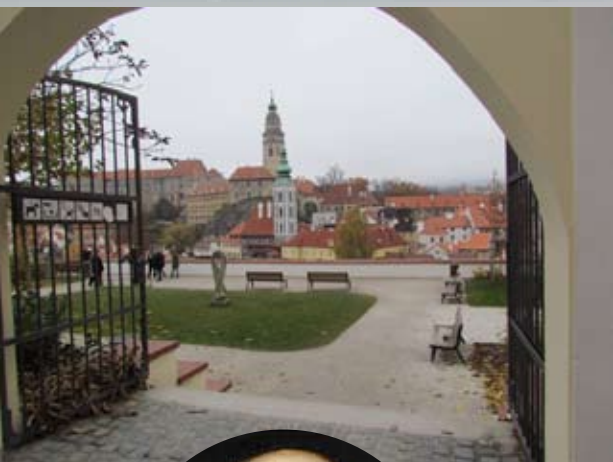

Only now, almost four hundred years after the publication of the Rosicrucian manifesto and the Alchemical Wedding of Christian Rosenkreutz, are we awakening to the full significance of that moment and its relevance to our own epoch.

Join us on this imaginative and spiritual rediscovery of that magical time in the very region where "it all took place". We travel from Prague in our coach through the lands of castles, rivers, dragons and ancient heroes to the lands of old Bohemia.

Days 6 & 7

The roles of Cesky Krumlov & Kutna Hora

Cesky Krumlov is one of the most beautiful small towns in Europe. Rich in history and architecture, it has been designated by UNESCO as a world historical monument. Although, largely forgotten in the West until recently, it was the center of alchemical study during the Renaissance under the guidance of Count

Wilem Rozmberk. Idyllically situated in a valley in the Blansky Forrest and encircled by the crystal clear waters of the Vltava river, this town will delight you with its little old town square, gardens, and lovely restaurants dotted along the river.

We will spend our day walking through the township, taking in the rich, evocative atmosphere of old Bohemia with its winding cobbled streets. We will view the ancient medieval buildings and small alleys that transport us to another time and place! It feels as if the upheavals of European history over the past few hundred years have passed it by.

We will have a guided tour through the spectacular 13th century castle "Krumlovsky Zamek" known as the "Pearl of the Renaissance" and learn the history of the Czech noble who was born on March 10, 1535, in Schützendorf Castle in Austria. His parents, ranked among the most powerful and influential people in the Austro-Hungarian Empire, held castles and properties throughout the north central section of the realm. Wilhelm, their oldest son, was educated at a private school in

Bohemia and spent the years from 1544 to 1550 at a bishopric college in Passau. After finishing his studies, he went to Vienna and was welcomed into the court of Emperor Ferdinand I von Habsburg. Later, when Rudolf II took power, Vilem became a diplomat in his court. He would also become the highest royal officer in Prague in the service of Emperor Maximilian II.

This full cycle, brings us back to the birth place of the International Alchemy Guild that Aurelius, our alchemy teacher currently belongs to. This modern Alchemy Guild grew from a small group of practicing alchemists from Austria and Czechoslovakia who began holding informal meetings in Vienna in the 1970s. Members of this group traced their lineage back to Wilhelm von Rosenberg, a sixteenth-century nobleman who founded a group of freethinking alchemists made up of both spiritual and practical alchemists. It also included fellow craftsmen who had been outcast or persecuted by political or church authorities.

We will visit the biggest Rozmberks' castle "Rozmberk" and the two fantastic monasteries Cistercian Vyssi Brod and Zlata koruna and the nearby beautiful labyrinth.

We will also visit the Moldavite museum, an incredible display of the 15 million years old moldavite olive green crystals which were formed by the impact of a giant meteorite. Most of the rocks, melted by the impact and cooled while they were airborne, fell in central Bohemia. Some say, this is the prime reason that alchemy developed in this land, long before anywhere else in the world. Did the ancient alchemists use moldavite as part of

Days 6 & 7 CONTINUED

The roles of Cesky Krumlov & Kutna Hora

DID THE ANCIENT
ALCHEMISTS USE
MOLDAVITE AS
PART OF THEIR
“PHILOSOPHER’S
STONE?”

their “Philosopher’s Stone? Is this the reason John Dee and Edward Kelly and so many others were attracted to Bohemia? Be sure to ask our traveling alchemist Aurelius Electrum this vital question when you are here with us in Cesky Krumlov!

This is also where your author of these notes, Roger

Green, had a powerful “I have been here before’ deja vu experience one evening in 1996, as he traveled to Cesky Krumlov for the first time over the border from Austria. He knew then he had a deep relationship to the land of the Bohemes (the old tribe was called Bois or Boji) and has been teaching and working there ever since!

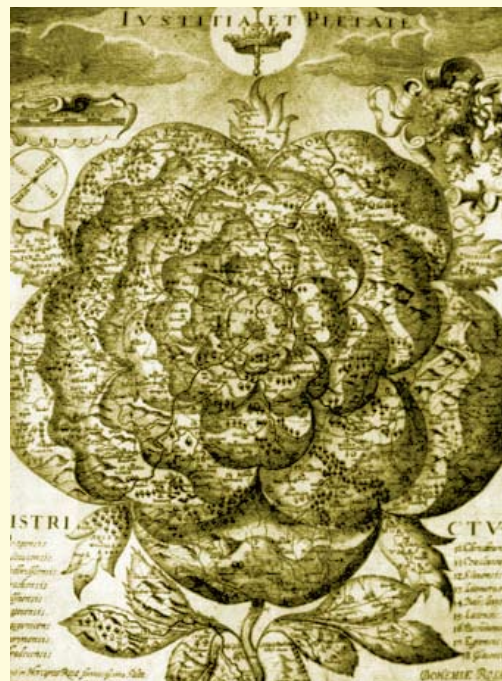

The role of Kutna Hora

Kutna Hora was a silver mining town, which began, in medieval times in Bohemia. Its sacred geometry is embedded in the town’s architecture and underground labyrinths. Also, more than 20 ceramic prehistoric cultures have been discovered in the area. Two “henge” circular sanctuaries made of earth and wood and a thousand years older than Stonehenge, were recently discovered (they are called “rondels” in the Czech language).

The town developed, during the medieval period, into the second most important city next to Prague - a royal city endowed with monuments that symbolized its prosperity and it is now a UNESCO heritage site. The Church of St Barbara is a jewel of the late Gothic period and the Cathedral of Our Lady at Sedlec (referred to as “Bone

Church”) is an adventure in architecture, it was restored in line with the Baroque taste of the early 18th century. Both were to influence the architecture of all central Europe. These masterpieces today form part of a well-preserved medieval township, along with a clutch of great little bars and restaurants serving fresh beer and traditional food.

We will visit a special glass factory in Svetla nad Sazavou. Their showroom is a fairytale place! You will have a tour of the factory and witness the tradition of glass blowing and cutting that has made the Czech people so famous in the world. Some of our teachings in the Alchemy of Prague event are about the lost secrets of making “the alchemy” glass from ancient Bohemia (they don’t know how it was done and they have not been able to replicate it) Will our group solve this mystery?

Days 8, 9 & 10

International Healing Water Technology Symposium

Health, Energy and the “Wonders” of Water, Hydrogen and Oxygen

We are excited to announce the 2016 International Water Technology Symposium in Prague June 10 – 12, 2016, the theme will focus on different perspectives of research on the alchemy and science of water and the technologies that are emerging for this powerful healing element in our lives. Discover the intense power of water and the ‘magic’ it holds deep inside.

Water is truly one of the great mysteries of life and there are many questions regarding this common substance that modern science has yet to understand. Exactly what functions does water facilitate on our planet and in our bodies? What is the best water to drink? Can we unlock the power of water to create energy? Is it possible to run a car on water? How can it be used for powerful healing? What is the best way to ‘energize’ it? What happens when you add extra hydrogen and oxygen to water? What happens when you magnetize water? Does water have a memory and how does it retain information? How do you use water to help with cancer and other ailments and diseases?

Never before in the history of mankind have we realized so much about simple everyday common “water”. We hear stories in the news about the importance of water and the effects that it will have on our lives, from drought, severe flooding, future water wars and climate change. We

are gathering some of the world's foremost experts on water to Prague to educate, demonstrate, debate, discuss and celebrate the deep nature of water and all its powers and mysteries. There will be several hands on demonstrations and several prototypes available to witness and try for yourself. Join us in unraveling the mysteries of water and see what the future has in store for you.

The Wonders of Water

The science of water is becoming more surprising all the time. It is not just a single homogenous substance that we have thought it to be. For example, water (H₂O) has many varieties depending on which of the three hydrogen isotopes are involved, the size of the loosely held molecular groups called “charge clusters,” the frequencies both subtle and gross that can be imprinted and stored in water. It is an absolutely key ingredient in producing Life as we know it. We believe The Power of Water to heal, cleanse, regenerate and give life to our body, mind and soul has been underestimated.

The Nature of Oxygen and Hydrogen

Everyone knows how essential oxygen is for life and most of us have heard of, or witnessed, the miracles of various ozone therapies, but how many realize that Hydrogen plays just as important, if not greater, role than oxygen in the human body and for all life on the planet. We will have lectures from experts on the nature of

H₂O

Days 8, 9 & 10 CONTINUED

International Healing Water Technology Symposium

oxygen and hydrogen (the smallest and most abundant particle in the Universe). You will hear about the most cutting edge water spa therapies on the planet as well as the great potential that Hydrogen has for healing.

From Rudolf Steiner, Victor Schaubberger and the cutting edge of modern quantum mechanics! You will learn the significance of the golden mean ratio and the frequencies of Hydrogen. We are pleased to announce the premier public unavailing in Prague of the Theraphi Plasma Healing Device (formally known as MAP) which is based on technologies developed by some very significant but little known innovators in modern times, Tesla, Lakhovsky, Rife and Priore. It combines harmonically inclusive cascading frequencies of hydrogen, brain waves and Schumann resonance. Be one of the first to experience the amazing effects of this device along with the clinical data that will be presented by its inventors.

Join us on this roller coaster ride of information, demonstrations and practice. We are committed to developing innovation in health, agriculture, water treatment, sustainability and alternative energy production. Come witness this collaboration of inventors, visionaries, scientists, entrepreneurs, and investors. A forum for brilliant ideas, technology and new paradigm thinking, dedicated to the enhancement and preservation of our environment and self-empowerment in all aspects of life. As someone once said 'Problems cannot be solved by the same level of awareness that created them'. As we measure, repeat, validate, debate, discuss, analyze and share, you will discover dynamic and proven solutions

to the growing energy and environmental needs of our planet, and ways towards a more humane system of healthcare. Join us if you are interested in being part of the solution-not the problem...

Healing Waters for Cancer treatments

Oxygen and the treatment of Cancer

Oxygen deficiency has long been linked to disease, going back to Dr. Otto Heinrich Warburg in 1931, when he won the Nobel Prize for showing that cancer is caused by

Days 8, 9 & 10 CONTINUED

International Healing Water Technology Symposium

a lack of oxygen respiration in cells. He said that in normal cells, the replacement of oxygen respiration with the fermentation of sugar was a cause of cancer... that normal cells meet their energy needs with oxygen, while abnormal ones meet their needs (mostly) by fermentation. Normal cells are obligate aerobes, but cancer cells are partial anaerobes. Your cells (excluding your red blood cells) each contain from 50 to 5,000 little "power plants" called mitochondria that produce the fuel needed for your cells to function. They demand oxygen as their raw material, but if they must, they can ferment sugar to produce energy. And they'll do exactly that in the face of oxygen depletion. They'll thrive on fermented sugar. Then, because this situation is not optimal, your cells' energy levels drop. They get tired, fatigued, with nothing left to give. If you're low on oxygen (which happens more easily than you might think), your cells go into anaerobic mode, triggering a cascade of negative results. First, it slows your cells' energy production. That slowdown leads to an aging body and many kinds of illness – including cancer.

So although fermentation lets these cells survive, they no longer function at their best. Instead of performing their regular job or communicating properly with other cells, their "job" becomes to replicate and grow. And that can lead to cancer.

Most people think of oxygen as a gas. But it can also be found in liquid form.

Cell oxygenation happens 10 times faster if you drink oxygen instead of breathing it.

The quality and quantity of oxygen absorption into your liver and intestine is 6 times greater when you drink properly oxygenated water than when you breathe it. That's no doubt been an impetus behind recent attempts to increase the oxygen content in water.

In this presentation, find out how to make water "wetter" and your health better.

- Can water be created to contain remarkably stable high oxygen levels?
- How do you structure water so that it has the benefits of more oxygen available to release slowly in the body?
- How do you produce a partial change in the molecular structure of the water?
- How do you enrich water with oxygen?

Days 8, 9 & 10 CONTINUED

GROWTH, SEED
GERMINATION
SUCCESS, AND
BIOMASS YIELDS.”
ROGER GREEN &
DAN WINTER

- How do you use electric and magnetic field operating at a specific frequencies?

The structure of this water is called a cluster. Its basic structure is a tetrahedron – 4 water molecules form the structure H₂O₄. These clusters remain stable for long periods of time. Because of the cluster's small size, it can more easily penetrate cell membranes, or, alternatively, it can remain in the intercellular space.

- How to produce smaller, more stable water clusters
- How to produce extra high levels of stable dissolved oxygen
- Dissolved oxygen that reaches and enters cancer cells without the need for hemoglobin
- Triggers redox reactions within seconds (which improves mitochondrial activity)
- Triggers apoptosis – an increase in cell energy level and membrane potential
- Sparks cell re-differentiation, a proof of the mitochondrial activity taking place

Re-structured water can be delivered to your body two ways – through your skin and through your stomach. For chronically or seriously ill patients, bath therapies are recommended in addition to the drinking water. The skin's capillaries quickly absorb high levels of oxygen during prolonged immersion in re-structured water at exactly body temperature.

Healing with water has hundreds of years of development

Bathing in 'healing' water helps patients with severe skin conditions to improve greatly. These included burns, lymphoma, varicose ulcers, physical trauma, and viral, bacterial, and fungal infections.

Bathing regimens have helped remediate several kinds of cancer as well as cognitive decline. For hundreds of years, Europeans (and other parts of the world) have used 'water spas' for dramatic improvements in oxygen saturation, reaction times, cognition, and blood pressure (both systolic and diastolic). Water facilitates ongoing cellular repair and regeneration, aids the detoxification process, and refreshes and re-energizes your body. It also reduces inflammation and allergies.

Entire textbooks have been written about the benefits of oxygen and oxygen therapies for many health conditions, including cancer, infections, cardiac rehab, burns, and more. Studies have showed that drinking oxygenated water enhanced tissue oxygenation, because sooner or later poor oxygenation will catch up with you. The oxygen in the water penetrates the mucous membranes of your stomach and GI tract to reach your tissues. In a person who suffers from a disease, the mitochondria are often trapped in a perpetual low energy state. The oxygen in the water helps to increase the membrane's energy potential. It takes a "jolt" to push your low energy levels higher. Once you're ill, this is not something you can do through drinking regular water or exercising.

Almost everyone is oxygen deprived. Sufficient oxygen isn't enough. You also need healthy blood circulation and adequate hydration to carry the oxygen to all the tissues and cells it needs to reach.

Come and find out more how re-structuring water might help.

Days 8, 9 & 10 CONTINUED

International Healing Water Technology Symposium

AGING IS
ESSENTIALLY:
OXIDATION FROM
WITHIN.

How to test and analyze water's vital qualities. What are the best methods?

Water is a complex subject of study, and its properties depend on a great number of factors. Water research shows clearly that waters of the same composition can exhibit radically different properties. Therefore water quality analysis based purely on the assessment of chemical composition and content of contaminants is incomplete. We need an extended definition of water quality and complementary testing methods, that will be able to reflect water's capacity to store information and its ability to support life. Also we need to distinguish between the great number of effects various products are claiming to have.

In this presentation, you will discover selected sets of qualitative and quantitative methods to describe the influences that have shaped a particular water's quality, and predict its effects upon living organisms.

Hydrogen for Human Health

You may have heard of hydrogen on the periodic table and as a part of water, but did you know that hydrogen as a molecule has tremendous potential to improve and maintain your health? Through this presentation, you will learn the following:

- How Hydrogen works in your cells
- Research that shows the benefits of hydrogen in a variety of disease models
- Ways that you can apply hydrogen to your life
- Be part of the Hydrogen Revolution for Health and Wellness.

Hydrogen

Aging is essentially: oxidation from within. As you age, your antioxidant defense system (your ability to fight free radicals) decreases significantly, leading to faster aging, low energy, and health challenges.

H₂ is the most effective antioxidant. As the smallest molecule it scavenges free radicals most efficiently, protecting DNA and RNA from oxidative stress and as a result from most diseases. Besides, H₂ shows to improve cell signaling functions, metabolism and gene expression. Molecular Hydrogen's vast therapeutic potential has recently been discovered. Over 400 scientific studies indicate beneficial effects for more than 137 conditions where Molecular Hydrogen acts most effectively.

Molecular Hydrogen shows promising results for obesity, type II diabetes, hypertension, fatigue, cancers, neuro-degenerative diseases, Alzheimer, Parkinson, chronic pain and inflammation, allergies, auto-immune disorders amongst

Days 8, 9 & 10 CONTINUED

International Healing Water Technology Symposium

numerous others. Athletes report great improvement of performance recovery time and endurance with lack of lactic acid build up. Free radicals are the enemy of performance. They wreak havoc on muscles by contributing to lactic acid production and inflammation.

Drinking and bathing in hydrogenated water offers efficient anti-oxidation, intercellular rehydration, anti-inflammation and pain relief. Molecular Hydrogen has cell protective properties which prevent tissue injuries often related to intensive sport-activities. Administration of molecular hydrogen can be easy, safe and efficient by drinking and bathing in hydrogenated water and use of Hydrogen releasing capsules. Other ways used in research include the breathing of pure Molecular Hydrogen gas and intravenous injections of Hydrogen saturated saline preparations.

O3 - Ozone Therapies

Ozone is an instable form of Oxygen where 3 Oxygen atoms are bounded. Ozone carries the role of nature's sanitizer with bacteria killing properties 3000 times those of chlorine. Ozone is strongly oxidative with it's associated benefits for hygiene and health and can be ingested due to it's oxidative qualities as a free radical fighter.

Drinking and bathing in ozonized water has been shown to be effective in destroying pathogens e.g. viruses, bacteria and fungi. Ozone water baths allow for a profound cleaning and oxygenation of the skin. Ozone kills some cancer cells and can slow down tumor growth.

More Oxygen is provided for the body and its functions by drinking ozonized water. Ozone is successfully used in medical practices by means of intravenous infusions. Ozone breaks down harmful synthetic chemicals as pesticides and odor-causing agents.

This presentation is by one of Belgium's leading water spa clinics. Find out first hand the experience of running a healing water spa!

Water for Health

Water is truly one of the great mysteries of life, there are many question regarding this common substance that modern science still has not fully understood yet it is the foundation of all life. In the mid

Days 8, 9 & 10 CONTINUED

International Healing Water Technology Symposium

90's Paul Harris was a co-founder of a water technology company called Sacred Water Inc. As one of the first companies creating imprinted and structured water the focus was water research and producing the worlds best drinking water. 20 years of research has led him to many amazing discoveries which he will be discussing. Exactly what functions does water facilitate on our planet and in our bodies? What is the best water to drink? We are born in water, drink and swim in it, it is the steam that eases congestion and the ice that reduces swelling, water takes on many forms in our daily lives. It influences 100 percent of the processes in our body, come find out how.

Water for Energy

Can we unlock the power of water to create energy? Is it possible to run a car on water? Can we use water to provide heat and power for our homes? Oxygen,

without it we would cease to exist. The third most abundant element in the universe, it makes up two thirds of your body weight and half of the mass of the earth's crust.

Hydrogen, this tiny atom has a lot in store for us as we are just beginning to unravel its mysteries. 99% of the universe is Hydrogen and most of it is in its highly excited plasma state. From Michael Faraday to Andrea Rossi, Paul Harris will discuss the diverse history of water's role in energy production. From the Pons and Fleishman Cold Fusion debacle to today's Low Energy Nuclear Reactions, Hydroxy fuel (Brown's Gas, HHO etc.) and renewable energy for Hydrogen production. Paul will also share various technologies and inventions that he has developed over the years to harness the power of water.

New Research Supports the Theory That Water Has Memory and therefore "Emotion"

New research from the Aerospace Institute of the University of Stuttgart in Germany supports the theory that water has a memory—a claim that could change our whole way of looking at the world. Does water have memory? Can it retain an "imprint" of energies to which it has been exposed? This theory was first proposed by the late French immunologist Dr. Jacques Benveniste in a controversial article published in 1988 in *Nature* as a way of explaining how homeopathy works. Benveniste's theory has continued to be championed by some and disputed by others. The fascinating recent experiments with water "memory" from the Aerospace

Days 8, 9 & 10 CONTINUED

International Healing Water Technology Symposium

Institute of the University of Stuttgart in Germany indicates results with different types of flowers immersed in water are particularly evocative. If Benveniste is right, just think what that might mean. More than 70 percent of our planet is covered in water. The human body is made of 60 percent water; the brain, 70 percent; the lungs, nearly 90 percent. Our energies might be traveling out of our brains and bodies and into those of other living beings of all kinds through imprints on this magical substance. The oceans and rivers and rains might be transporting all manner of information throughout the world.

Studies carried out by Dr. Masaru Emoto have shown that the thoughts of ordinary people can alter the structure of water without there being any actual physical contact with the water, and many other very important effects. If the water receives positive thoughts and is then frozen, the resulting crystal structure has a ordered often beautiful shape. While on the other hand, if negative thoughts are aimed at the water, whether just by looking at it and thinking, or by writing those thoughts down on paper, the resulting crystal shape is disordered, fragmented when the water is frozen.

The Bio Active Field and the nature of WATER

BIO-ACTIVE System's Dan Winter was one of the first scientists to provide evidence that the shape of the universe is a Stellated Dodecahedron. As a

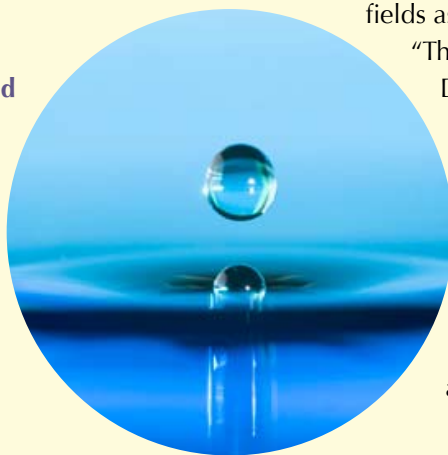

shape capable of producing the perfect fractal, the stellated dodecahedron can cause, according to Winter's research, perfect charge collapse (implosion based on the Golden Mean) that creates gravity.

The centripetal conjugate / fractal (therefore Negentropic) electric magnetic fields accelerate life and all living systems. Designing and maintaining life is the essence of the Hermetic project. It was the difference between life and death, and the turning point in the evolution of civilization. The Golden Ratio is the wave solution to constructive compression implosion, phase conjugation, negentropy and therefore life force, perception, and consciousness. All biology remains alive to the extent its electric-magnetic field is centripetal. That's what holds it together.

Dan Winters Implosion Company presents solid science based on the unifying principles of the "Fractal Field" along with its technical applications, such as the water energizing device known as "The Imploder". An inspiring new order of pure scientific principles, the fractal field operates and expresses itself through "Phase Conjugation" and the design of life giving, healing, age regressing charged fields as used in the pioneering "Theraphi Plasma Healing Device" you can witness at this event.

Water and the Nature of Fractals

The Fractal Field Unified Theory and the principle of the Golden Mean allow for the addition and

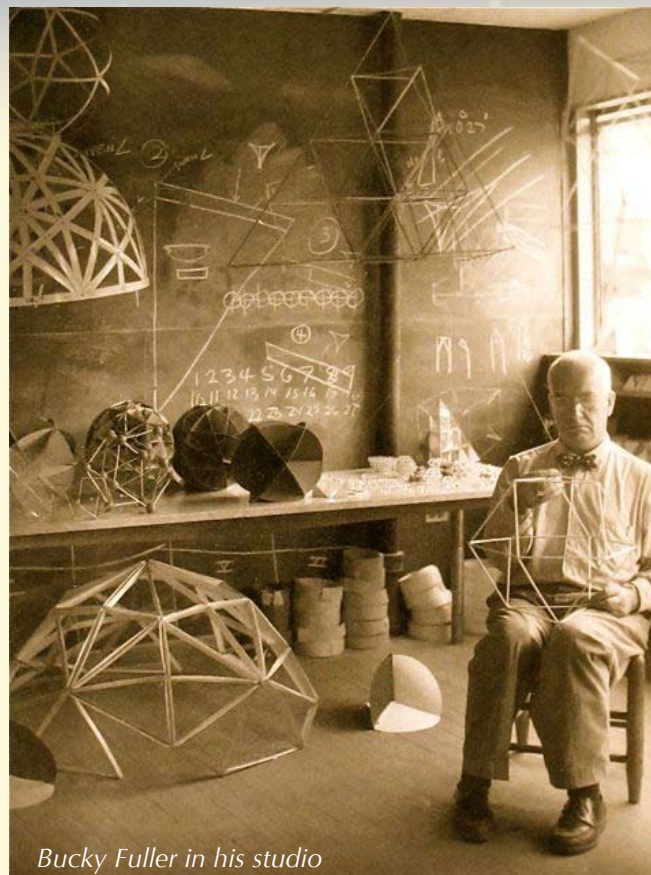

Days 8, 9 & 10 CONTINUED

International Healing Water Technology Symposium

multiplication of waves of charge and energy. Fractals exhibit self-similarity, meaning their inner structure has the same pattern as their outer structure (like a pine cone or a fern tree). Just as fractality describes the geometry of waves of energy or charge, fractals manifest as wave patterns that evolve ad infinitum - like an encoded thread linking larger spirals to infinitely smaller ones. Only the Golden Ratio allows for constructive interference of wave addition and multiplication. Because a fractal signifies infinite compression, it is what spans the gap between the symmetries of the very small and the very large.

**"I LIKE TO THINK
OUTSIDE OF THE
STELLATED ICOSA
DODECAHEDRON."
- PAUL HARRIS**

The idea of symmetry is vital to both. Symmetry is part of the language of nature, from the molecular level on up. Quantum physicists can explain the menagerie of fundamental particles we observe - quarks, gluons, fermions, bosons and more - as different facets of a symmetrical object. Relativity, too, is an expression of the symmetries that exist between space and time (Einstein's famous equation $E=mc^2$ articulates a symmetry between mass and energy). Ground breaking physicist Andrei Linde has found fractals helpful in modeling the behavior of the universe, and is currently spearheading research suggesting that the fractal nature of space may actually be the cause of gravity. World famous research scientist El Naschie has calculated ground breaking mathematics proving the universe is a fractal based on the Golden Ratio. The work of Alain Connes has shown that non-commutative spaces naturally evolve toward fractality. In fact, most astrophysicists now agree

Bucky Fuller in his studio

that the shape of the universe is a dodecahedron and that the Golden Ratio is the essence of fractality and thereby the root cause of gravity.

Sacred Geometry and the Nature of Water

Sacred Geometry is the blueprint of Creation and the genesis of all form. It is an ancient science that explores and explains the energy patterns that create and unify all things and reveals the precise way that the energy of Creation organizes itself. On every scale, every natural pattern of growth or movement conforms inevitably to one or more geometric shapes. At the root of all cultures is a single, universal

Days 8, 9 & 10 CONTINUED

International Healing Water Technology Symposium

code of knowledge, which has the potential to unite all things, referred to as sacred geometry (the term first coined by our friend, colleague and author Robert Lawlor). From its simple base in pure numbers, it develops through musical harmonies and geometric proportions into a complete, coherent picture of creation.

Mother nature uses geometry everywhere you look, from the spirals of the nautilus shell, galaxies, sunflowers, snowflakes, flower petals, honeycombs and the deepest design of the smallest particles known to humanity! Sacred Geometry is the modern bridge between science, physics and spirituality. It is described as the Architect of the Universe, the footprint of God, the design of the infinite. It was always used in the planning and construction of religious structures such as churches, temples, mosques and sacred art. All the Platonic solids (including the shape of water) are Golden Mean proportioned. Representative of our global scientific and philosophical heritage, the Golden Mean is now being rediscovered and applied to cutting-edge physics and breakthrough technologies.

It is from this deep wisdom and understanding, that Sacred Geometry and Alchemy is able to provide us with powerful medicines, reflections on the “Order of Things” and modern day applications such as technologies involving healing water, bio-architecture and sustainable energy.

The Revolutionary “Theraphi Device”

At the Healing Water Conference, you can witness the use of the “Theraphi” device and try it yourself! The inspiration for the

creation of the Theraphi device is based on over 100 years of development with the pioneering efforts of Nicola Tesla, Georges Lakhovsky, Royal Raymond Rife and especially Antoine Prioré in France.

It creates precise frequencies, based on hydrogen and the golden mean ratio, which allows the addition and multiplication of waves of charge and energy. This centripetal negentropy waveform is the only type of electromagnetism that effects the bodies cellular regenerative system.

The Theraphi **produces a powerful double conjugate plasma light / infrasound “Bio-Active Field”**, using modulated electromagnetics from robust solid-state emitters, which pass through a unique mixture of noble gases. It produces an extraordinary implosive (Negentropy / life giving) plasma field which has been proven to have medical applications.

The Theraphi technology has the potential to have a huge influence on pain reduction, longevity, enhancing immune systems and reducing healing times. It restores coherence in single and multicellular organisms thereby increasing the potential of homeostasis in cases of many degenerative diseases. It is also known for increasing circulation and sensation in areas where these have been limited or lost.

Applications

- Pain reduction (as both Prioré and Rauscher documented)
- Swelling reduction
- Wound regeneration
- Cancer remission (well documented by

Priore and the French authorities)

- Stem cell switching (differentiation)
- Reducing the effects of aging
- Cell memory reversal

What is Negentropy

Negentropy is reverse entropy. It means things becoming more in order, it is the force that seeks to achieve effective organizational behavior and leads to a steady predictable state. Life is considered to be negentropic because it takes things in less order, like food, and turns it into things in more order, like cells in the body, tissues, and organs. Negentropy and self organization is well documented in phase conjugate optics. Symmetric coherent wave fields converge in such a way that their focal point becomes centripetal and self organizing to create an increase in net order. The Theraphi produces a negentropy effect on the cells and tissues of the body, which is the only scientific definition we have of "Healing and Rejuvenation" and "Anti-Aging".

What is Cell Memory Reversal

The actual "healing" system in the body is the cellular regenerative system. All living things are made up of cells. The cell is the smallest living thing that can do all the things needed for life. All cells must come from pre-existing cells, and have continuous repair and maintenance of their own existence. This is an electromagnetic system, but of a rare kind not used in our common power systems. Instead of using the common transverse EM waves, this system uses longitudinal EM waves and time-polarized EM waves. A time-polarized

EM wave is an energy current in the time domain, as in the quantum field theory.

There we are introduced to time-polarized photons a "compression and rarefaction of the local rate of flow of time".

Biological systems use longitudinal EM waves, frequency modulation, amplitude modulation, and "time-domain" electrodynamics which the Theraphi produces. In fact, it uses it to heal damaged cells, organs and tissues.

The Theraphi System tailors the specific scalar longitudinal waveform, producing mitogenic radiation, primarily in the UV region of the spectrum but also involving other frequencies. It directly effects a cells nucleus with phase conjugate (time reversed) waves, which helps restore the cells memory of being "healthy" - the process of **Cell Memory Reversal**.

International Healing Water Technology Conference

Meeting point

6pm Friday June 10th

Clock Tower Old Town Square,

Timetable

Friday June 10: 7 to 10pm

Meet the Teachers

Roger Green (New Zealand / USA)

Roger Green has been active for over 25 years in environmental, eco-design, alternative healthcare education and emerging green energy technologies initiatives around the world. He is the founder and director of the Breakthru-Technologies Company, which has sponsored several international conferences and is financing many innovative inventions. He is an early seed investor in the emerging field of cold fusion, aka LENR, Low Energy Nuclear Reactions, and has been active in the promotion of the E Cat Technology based on the invention from the Italian, Andrea Rossi. In 2009, along with Dan Winter, he launched the water treatment device called The Imploder, and set up the project "Bloom the Desert". Currently, Roger has been working with a team of scientists to re-create the Priore rejuvenation technology, which in the period of the 1960's demonstrated amazing healing and natural pain relief to hundreds of well-documented patients.

Roger Green is recognized as one of the world's most innovative, dynamic and expert teachers on modern day natural healthcare incorporating both eastern and western themes, having given presentations in over 70 countries. In addition, Mr. Green is passionate about creating a more humane system of health care through his work of nearly 30 years as Director of The Academy of Healing Nutrition, with locations in New York and Prague.

Paul Harris (Aurelius Electrum - Canada)

Paul Harris is an inventor, eclectic researcher and educator from Canada who has spent most of his life studying various forms of physical science as well esoteric knowledge and phenomena including Alchemy and Sacred Geometry. He has taken a multi-disciplinary approach to life and has developed a knowledge-base in a wide area of studies including Water Technologies, Alternative Fuel and Energy Systems, IT, Electronics, Chemistry, Plasma Physics, Herbology, Permaculture, Archaeoastronomy, Esoteric Philosophy, Spirituality and Religion.

Paul's inventions include various electro-medical devices including the latest, "The Theraphi" with Dan Winter's bioactive frequency signatures. He has inventions and patents involving water processing, petro-chemical refining, waste remediation, oil sands extraction and energy saving systems. Being a polymath Paul has found this diversity necessary in understanding the fundamental principles behind the workings of nature. He has taught courses internationally on practical Alchemy, Sacred Geometry and the applications of these systems for the past 15 years. Paul has led many study tours of Mayan sites throughout Mexico and Belize.

Terry Burns (USA)

Dr. Teresa Burns is an U.S. English professor and writer who studies Renaissance Hermeticism, especially the connection between the magical systems of John Dee, Edward Kelley, and Giordano Bruno to the literature and architecture of the time. Co-author, student and friend of Vincent Bridges, Terry has written many popular articles for the Journal of the Western Mystery Tradition; she and Nancy Turner also translated the first English edition of Tuba Veneris, attributed to John Dee, and retranslated the first 18 theorems of Dee's Monas Hieroglyphica. Terry and her husband Alan Moore are finishing a book on Dee and Kelley's Enochian system. In her spare time, she writes fiction.

Meet the Teachers CONTINUED

J. Alan Moore (USA)

Alan Moore, or “Alaerian” as many know him, is a gifted harper, guitarist, flutist, pianist, and perhaps the world's only Enochian musician. He has made a life-long study of the western mystery tradition, with over thirty years of experience in the Golden Dawn magical system and the practical application of magical arts. As a musician, he focuses on the use of music to shift energies and create magical states of consciousness. His writing appears in the Journal of the Western Mystery Tradition. Alan describes his Enochian or Ophanic work as a part synthesis, part revision and part explanation of Dee and Kelley's system, especially as it connects to Sacred Geometry. A good friend and co-practitioner of magic with the late Vincent Bridges, Alaerian is a firm proponent of Vincent's insights into the function and use of the Enochian system.

Dan Winter (USA/ France)

Regarded as one of the most dynamic thinkers of our time, American-born Dan Winter is an internationally respected academic, physicist, author, accomplished keyboard artist, master animator, inventor and one of the foremost authorities on Sacred Geometry and the Scientific Nature of Consciousness.

Dan has placed himself on the cutting edge of science and uses his teachings to inspire others to take a fresh look at their belief systems, environment, health and the development of their consciousness. By drawing on science, mythology and popular culture, Dan is constantly formulating breakthrough ideas about the deep connectedness of all things and how the profound nature of our “oneness” can be approached via sacred geometry, architecture, art, maths, biology, computers, electronics and myth. His theories have formed the basis of notable research in the US. The hi-resolution projection and sheer scale of Dan's visual presentations, combined with his lively lectures, extraordinary knowledge and sonic music samples taken from biological events, make for an unforgettable and unique experience.

Eliška Bridges (Czech Rep)

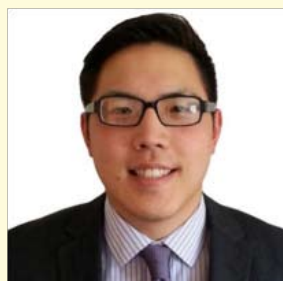

Born and raised in the Czech Republic, Eliska has studied Czech and Art History all of her life. As a young woman she moved to Prague and studied Tourism, Contemporary History and Oral History. In the past, Eliska worked in various positions for Czech Airlines, followed by several years at the Prague Castle and then later as an independent tour guide. In 2012 she met Vincent Bridges when translating one of his Prague esoteric walks. The work cooperation soon changed into a partnership in which they shared a passion for history and esoteric knowledge. Currently she focuses on organizing guided tours, excursions and working with the spiritual practice of the “Dances of Universal Peace.”

Meet the Teachers CONTINUED

Eva Lenova (Czech Rep)

Eva is a translator, interpreter, lecturer, author and guide. Her life-long interest in history, traditions, wisdom, art and science of our ancestors and fascination with metaphysics. This established a good base from which she worked and studied with Vincent Bridges. She supported him in his search for evidence and resources for his books, guided him to places connected to his work in Czech, and interpreted and helped to organize numerous seminars, workshops, lectures and pilgrimages both in Czech and abroad. Their alchemical walks in Prague were popular, with a number of sacred geometry students enjoying their magical rituals in the church at Zelena Hora as well as the labyrinth workshop near Cesky Krumlov. An enthusiastic group participated in the Winter Solstice 2012 ritual in Prague and some adventurers joined them in their South France tours (Gypsy festival in Stes-Maries-de-la-Mer, Nostradamus, Grail Quest and Cathars in October 2010 and May 2012) and to their last public event - Moravian Michael-and-Mary lay line pilgrimage (*as Vincent loved to call it*). Eva continues to guide groups of people to power places, lead rituals, organize pilgrimages and tours to traditional festivals. Eva is a member of the Czech Academy of Healing Nutrition team.

Victor Yoon B.Sc. (USA)

Physiology and Neuroscience/Hydrogen Researcher for 5 years

Victor graduated from University of California, San Diego with a Bachelor of Science Degree in Physiology and Neuroscience. His passion for learning about new and natural ways to overcome health challenges led him to discover molecular hydrogen in 2010. For over 5 years, Victor has studied the benefits of molecular hydrogen and promoted a variety of hydrogen related products. He wants to present his findings and research for the benefit of all people who want to optimize their health naturally.

Diana Siswartonova (Czech Rep)

Diana was born in Prague to Czech and Indonesian parents. Her mixed origin strongly reflects in her life and work. The sense for polarity and natural ways of connecting the opposites into one whole, are a strong theme of her life mission. Her direction over many years has been the fusion of art and science, which symbolizes the way of the union of heart and mind, feeling and thinking.

Her love of water, its beauty, its properties and mystery made her a sought-after consultant for non-chemical water treatments and purification. She works with natural technologies which support balance and the self-organizing properties of water, e.g. vortex technologies and new energy sources using nature mimicking systems. Her company provides various analysis of living water quality and she has been involved in many natural water development projects.

Meet the Teachers CONTINUED

Josef Tyls M.Sc. Ph.D (Canada/Czech Rep)

Dr. Josef Tyls is an industrial engineer. He was born in the Czech Republic and became a Canadian citizen in 1972. In 1985 Josef developed a unique high definition three-dimensional holographic audio system specifically designed for healing purposes. By 1992 Josef Tyls was recruited by Dr. Carlos Fenton Mason D.Sc. of Mato Labs to design and engineer medical ozone generation systems capable of continuous use without degradation. In 1994 Josef became heavily involved with researching the efficacy of ozonation for potable water processing, while investigating solutions to GVRD's water crisis.

It was during this research that he developed the hyper oxygenation process that became the fundamental technology platform for his company Vancouver Oxygen Research Technologies Ltd. which was then licensed to, and still in use by, the Avani Water Corporation in Burnaby B.C.

Josef has been involved with systems technology design throughout his working career and has successfully brought to market many of the technologies for nearly 30 years. He has built a variety of derivative and other innovative water purifying and enlivening systems, using the teachings of great water inventors like Walter Schauburger. Schauburger's assertions of the life force in drinking water being the quintessential electrolyte for all living things, form the philosophy behind the Josep Tyls water processes. When water is synthesized, recovered, precipitated, condensed or remediated and then energized, revitalized, re-oxygenated and kept active in storage, it again becomes the nourishing invigorate that we all need for life. His deep understanding of the fundamental structure of matter and its interrelationship with human consciousness is the basis of many of his unique technologies. The list of mentors, which Josef has studied and developed his technologies from: Dr. Nicola Tesla, Victor Schauburger, John Worrell Keely, Dr. Walter Russell, and many other pioneers of quantum physics.

Ralf Roessner (Germany)

Ralf Roessner has been working in the field of water research for over 20 years. His company IMTON GmbH produces the biodynamically farmed "light root" (*Dioscorea batatas*), a mountain herb that is used for many health problems. He is also a passionate bee keeper, and a Waldorf (Rudolf Steiner) teacher. He specializes in natural medicine, nutrition, healing water technologies, and education in the "subtle energy fields". His presentation at the water conference is "Water and the cosmic origin of life"

When talking about life and nourishment, one cannot avoid talking about water. Water is the most universal nutriment for all living organisms on our planet. There is a primordial source of life, a nourishing stream without beginning or end, which nourishes us over and over again. Can it be possible to retrace this source? In the lecture we shall follow the traces of life from the Earth into the cosmos and back to the Earth. What will we find? If we want to come closer to this mystery we need to follow the spiritual and ethereal and cosmic traces, that appear everywhere, where life unfolds and research its origin!

"It's not only that we need you for life, you yourself are the life"- Paracelsus

The Package

Important notes

Note (1)

Payment does not cover airfares, accommodation, museum and tourist entry fees, meals, drinks and transfers.

Note (2)

Book your own accommodation to suit your budget
We have a list of recommended hotels below, plus AirBandB is a good option

If you are traveling with a group, you might like to book an apartment with 2-3-4 rooms. June is a popular time to be in Prague so book as soon as possible to secure accommodation.

Note (3)

By purchasing the "Package" by 1st April you save a total of \$500 ++ USD

10 day Package includes:

Meeting Points and Venues

Meeting point - 6pm Friday June 3rd, 2016

Our seminar spaces are very close to the main old town square of Prague. You'll find Roger Green standing and smiling in front of the Old Clock Tower (just to the left of the clock- facing the clock tower) in the main town square. This is where all the tourists will be waiting for the old astrological clock tower to chime. We will walk you to the venue where our first event starts at 7pm at Edward Kelly tower /Alchemical Museum / Donkey and Cradle in the foot hills of the Prague Castle. Don't be late! Roger is not tolerant of late comers and you will be fined one Prague glass of beer!

Maitrea Venue

Maitrea is centrally located next to the Old Town Prague Square and is a fully renovated classic building built on Feng Shui and Eco Design principles. It is said the site has several geometrical energy lines converging and is considered a fine example of modern Feng Shui Eco design. It houses seminars rooms, client therapy spaces and one of the best vegetarian restaurants in Prague. The restaurant consists of two levels, the top level is small and intimate and full of natural light; the bottom level is spacious and welcoming. The wooden tailor-made booths, Buddha decorations, fountains, a fireplace and low lighting make the bottom level a quiet and lovely haven from the bustling Old Town of Prague. Olda Hozman, the architect

responsible for the complete restoration is a past graduate of Roger Green's Prague School of Feng Shui. The vegetarian menu is interesting and very affordable.

The International Water Technology Symposium will be held at this venue from 7pm Friday June 10th through to 5pm Sunday June 12th.

Maitrea

Recommended Hotels and notes

We highly recommend AirBnB or search for apartments for rent (see references below). You will need to book your own accommodation. Any hotel that has an address of Praha 1 means it is very close to the town's inner circle.

However, other area codes are OK as Prague has an excellent tram system and most head towards the town center. There is a variety of hotels listed - check on rates that suit your budget.

- www.airbnb.com • hotels.com
- kayak.com • orbit.com

Prague Hostels

- www.hostledowntown.cz (Prague 1)
- www.advantagehostel.cz (Prague 2)
- www.hostelmarabou.com (Prague 3)

Prague Apartments

- www.Bohemia-Apartments.com
- www.Goldenhorse.cz

Prague Hotels

- <http://www.prague.st/>

Very good for last minute offers on hotel rooms, many start at only 35 Euros per night, including apartments.
